Redistricting

Comment or Question

Thank you for all the work you've been doing on this topic. I'm glad that you're not "kicking the can" to the 2030 census, which will only make the disparities worse. There are several options that appear to reduce the discrepancy in representation to a moderate level (Options 3, 8a and b). I am curious about the numbering of the districts (not the mapping). it seems like Districts 1 and 4 have been switched? I live in District 1, where we last voted for our supervisor in 2017. If this neighborhood becomes District 4 due to a numbering change, we won't have the opportunity to vote on our county representation until 2024. That seems like a long break, especially if it results from a change in District number, and not a redistricting mapping change.
