Sick leave – 15 days per year. Flex (personal days) – 5 days per fiscal year. Paid holidays – 11 per year.

DEFINITION: Under general supervision, to perform education, inspection, investigation and enforcement activities intended to prevent, detect, control, and eliminate environmental health hazards; to administer and enforce pertinent federal, state and local statutes, ordinances, codes and regulations governing environmental health and sanitation; and to function as a positive and cooperative team member.

DISTINGUISHING CHARACTERISTICS

Environmental Health Specialist I is the entry level in the class series, fully qualified to independently perform the full range of duties. Incumbents exercise considerable independent judgment in conducting environmental health inspection and enforcement activities. Assignments involve the inspection of a wide variety of establishments, public and private facilities, and water and waste disposal systems for compliance with public health laws. Incumbents also perform plan review, permit issuance and educational activities to promote sound environmental health practices, and may function as subject matter experts in one or more areas of inspection.

Environmental Health Specialist II is the journey level in the class series. Incumbents are expected to make independent judgments with minimal supervision, possess a high degree of organizational skill and environmental health expertise; work effectively in most environmental health programs. This classification may also serve as a supervisor of professional or technical staff or serve as a project manager of a specialized environmental program performing such duties as program development, implementation, planning and coordination.

Environmental Health Specialist III is the advanced journey level in the class series. Incumbents are expected to make independent judgments with minimal supervision, possess a high degree of organizational skill and environmental health expertise; effectively supervise a cross functional team of professional and technical within a project team; manage the timely and accurate completion of a major project within established budgetary constraints; and work effectively in most environmental health programs. Incumbents in this class perform administrative duties and provide lead supervision to Environmental Health Specialists Trainees, I and II. Incumbents in this level may be required to have more than one Registration.

LEVEL OF RESPONSIBILITY AND SCOPE:

Environmental Health Specialist I receives general supervision from the Environmental Health Director, Deputy Director or Environmental Health Specialist III.

Environmental Health Specialist II receives general direction from the Environmental Health Director or Deputy and may provide supervision to professional or technical staff. May exercise technical and/or functional supervision and/or training to subordinate staff members.

Environmental Health Specialist III receives general direction from the Environmental Health Director or Deputy Director and may provide supervision to professional or technical staff. May exercise direct, technical and/or functional supervision and/or training to subordinate staff members.

EXAMPLES OF ESSENTIAL DUTIES – Duties may include, but are not limited to, the following:

Environmental Health Specialist I:

Plans and conducts inspections, investigations, and surveys of food establishments (including restaurants, schools, hospitals, and other public eating establishments), small water systems, sewage disposal systems, well constructions, swimming pools, recreational health facilities, occupied housing, underground storage tank facilities, solid waste facilities, hazardous materials facilities, hazardous waste generators, land use development, rabies and vector control and indoor air quality.

Issues permits or licenses when satisfactory conditions are found; performs inspections and investigations of sites; determines compliance or exceptions to compliance and takes steps to correct unsatisfactory conditions; determines and enforces penalty for non-compliance.

Investigates violations and complaints and prepares reports and recommendations; may be required to participate in a countywide program in the investigation and evaluation of radiological health hazards.

Collects water samples and prepare samples for laboratory testing; interpret sampling results and determine appropriate response to problematic results; educate public.

Interprets provisions of sanitary laws and regulations, advises on methods of meeting and maintaining sanitary requirements, and attempts to obtain voluntary conformance;

Investigates complaints regarding overflowing septic tanks and sewers, waste disposal, animal bites, insect problems, and food poisoning cases; and obtains facts, evidence, and samples needed in determining abatement and control requirements.

Reviews plans of proposed septic tanks, swimming pools, and food establishment installations to ensure conformance with acceptable standards and codes.

Inspects residences to evaluate sanitary condition of building, plumbing, lavatory facilities, and adequacy of lighting, ventilation and water supply.

Collects and compiles data; maintains records and prepares reports of daily and periodic inspections and violations, and prepares correspondence and reports relating to the work; performs necessary research.

Prepares complex reports independently and makes presentations at public meetings, including appeal hearings; prepares and maintains accurate records and files.

Provides technical expertise and coordinate with others within the Environmental Health Division, other County departments and divisions and other public agencies as necessary.

Attends meetings with community groups to establish rapport and provide education on environmental health topics for the purpose of improving environmental health compliance and awareness.

Performs related duties as assigned.

Environmental Health Specialist II (In addition to those duties as previously outlined):

Provides technical expertise in assigned areas of responsibility; makes inspections and investigations in a specialized program; actively maintains expertise of knowledge in specialty area and provides advice and direction to County leadership.

Responds to emergency or special conditions such as hazardous or toxic chemical spills as part of an emergency response team; determines risk through epidemiology, observations, and inspections; notify proper authorities and/or public as appropriate.

Environmental Health Specialist III (In addition to those duties as previously outlined):

Manages a County wide environmental health project or program; develops and implements program/project plan; identifies and coordinates necessary resources for project completion; provides staff assistance to the county on related issues and planning efforts.

Plans, organizes, coordinates and participates in all aspects of functions and tasks being performed in support of assigned project(s); develops and implements long term implementation strategies and timelines; updates/modifies strategies and/or timelines periodically and as necessary.

Reviews and evaluates operations and activities of assigned project(s); recommends improvements and modifications as necessary; plans, directs, and participates in the implementation of same.

Acts as a primary resource regarding assigned project(s) or area of expertise; its activities, issues and accomplishments to other Environmental Health Department management and staff, County management and staff, the public and outside agencies; provides requested information, data, and projections; represents the assigned project(s) or area of responsibility and the County's best interests, needs and priorities.

Represents assigned project(s) or area of responsibility to other private and public organizations, local communities, special interest groups, schools, academic institutions, research agencies, and the general public.

Establishes and maintains open communications with other departmental programs, projects, and multi-disciplinary teams; coordinates data, resources, and work products as necessary and upon request in support of a productive and positive working environment.

MINIMUM QUALIFICATIONS

Experience and Training:

Registered Environmental Health Specialist I – At least two (2) years of progressively responsible experience performing duties similar to an Environmental Health Specialist Trainee. Must possess a valid Environmental Health Specialist Registration with the California State Department of Health Services.

Registered Environmental Health Specialist II - At least four (4) years of progressively responsible work experience as Environmental Health Specialist I or equivalent. Designated positions may require additional and specialized licenses, certifications, and/or registrations such as Food Industry Sanitation and Food Safety Certificate; Underground Storage Tank Certification; Small Water System Maintenance Certificate; and/or Terrestrial Invertebrate Vector Control Specialist.

Registered Environmental Health Specialist III – At least six (6) years of progressively responsible work experience similar to an Environmental Health Specialist II or equivalent. Designated positions may require additional and specialized licenses, certifications, and/or registrations such as Food Industry Sanitation and Food Safety Certificate; Underground Storage Tank Certification; Small Water System Maintenance Certificate; and/or Terrestrial Invertebrate Vector Control Specialist.

Knowledge of: Basic principles and practices of a variety of science applications such as: geology, hydrology and soils science relative to sewage disposal, well construction, contaminated soil, and groundwater investigation and remediation; basic principles and practices of engineering, chemistry, biology and bacteriology; basic principles and practices for the proper disposal of sewage on-site; basic water well drilling

practices and procedures; Health and Safety Code of the State of California with reference to safe food handling and preparation, sewage disposal and water and local land use and land development ordinances and other applicable ordinances and the permitting process; federal, state, and local laws and regulations pertaining to environmental health standards and enforcement; basic principles of public health as related to potential environment impact; standard and accepted methods and procedures for inspecting and correcting unsanitary conditions; a wide range of public health risks and appropriate responses to those risks; basic provisions of the penal codes relating to public nuisances; standard and accepted office procedures methods and computer equipment; basic principles and practices of work safety; standard and accepted English usage, spelling, grammar and punctuation; basic statistics and statistical analysis and advanced mathematical calculations.

Environmental Health Specialist II, in addition to requirements of Environmental Health Specialist I, must possess knowledge of advanced principles and practices of environmental health factors which may include: water systems, waste water systems, vector-borne diseases, and other disciplines.

Environmental Health Specialist III must additionally possess knowledge of standard and accepted principles and practices of project management and standard and accepted methods of training and supervision.

Skill to: On a continuous basis, learn and understand all aspects of the job; intermittently analyze work papers, reports and special projects; identify and interpret technical and numerical information; learn to interpret relevant codes and regulations and apply County policies and procedures; learn to plan and conduct the more routine inspections; read and review blue print/blue lines and plans; and maintain accurate case records; work with various cultural and ethnic groups in a tactful and effective manner; obtain information through interviews; work fairly and courteously with the public; and work effectively with interruption; analyze situations quickly and objectively and identify and recommend proper course of action; utilize general and designated office machines and technology in a manner to successfully perform assigned functions; communicate clearly and concisely, both orally and in writing; use a computer, calculator, typewriter, telephone, facsimile machine, photocopy machine microfilm reader printer, thermocouple, and various field monitoring devices; prioritize assigned work effectively for successful job performance; understand and carry out a variety of both oral and written directions; meet the physical requirements necessary to perform required duties in a safe and effective manner for self and others; establish and maintain effective working relationships with those contacted in the performance of required duties.

Environmental Health Specialist II, in addition to above: On a continuous basis, must know and understand all aspects of the job; intermittently analyze work papers, reports and special projects; identify and interpret technical and numerical information; observe and problem solve operational and technical policy and procedures; interpret relevant codes and regulations and apply County policies and procedures to assigned functions; plan and conduct multiple inspections; read and review blue print/blue lines and plans; and maintain accurate case records; obtain information through interviews; work fairly and courteously with the public; and work effectively with interruption; analyze situations quickly and objectively and determine proper course of action; identify significant existing or potential environmental health problems and recommend appropriate action.

Environmental Health Specialist III, in addition to above: must possess skill to supervise the work of others in a positive and effective manner, as well as train, assign, review, and assist in the evaluation of subordinate staff.

License or Certificate:

Must possess a valid driver's license as required by the position. Proof of adequate vehicle insurance and medical clearance may also be required. Must possess a valid Environmental Health Specialist Registration with the California State Department of Health Services.

Special requirements: Must successfully complete pre-employment background investigation.

TYPICAL PHYSICAL REQUIREMENTS: While performing the essential functions of this job class, the employee is regularly required to use hands and fingers to operate a variety of objects, tools, equipment, computer keyboard, vehicles, and other specialized equipment; flexibility and endurance to stand, climb, stoop, kneel, crawl, bend, walk, reach, and crouch; talk and hear clearly and concisely to communicate with co-workers, general public, County staff and management, consultants and outside agencies and organizations on a continuous basis. Employee may be required to lift and/or carry and/or move moderately heavy to heavy objects in the performance of required duties.

TYPICAL WORKING CONDITIONS: Employee performs assigned duties both indoors and outdoors in a variety of climatic conditions including exposure to hot and cold temperatures; may work in rough terrain and remote locations on occasion. Continuous contact with other staff and management, other agencies and organizations and the general public is also required.
