Inyo County Risk Management IIPP Exhibit 1- Routine Inspection Form

ocatio	on/s inspected:			Date:	
nspec	tor name & signature:		E	scort:	
ignag	je and Recordkeeping	Yes	No	N/A	Corrective Actions
1	Signage in parking lot indicates that parking is at owner's risk.				
2	Workplace safety posters are displayed specific to site hazards.				
3	Is record of last 3 yrs of inspections available?				
4	Evidence to document periodic safety training as appropriate?				
5	Evidence to document new employees safety training?				
6	Occupancy limits: No room with 1 door has >49 chairs in it.				
7	Elevators have current and posted inspection notice.				
merge	ency Preparedness & Fire Prevention	Yes	No	N/A	Corrective Actions
8	Shade & Water (4oz/hr/EE) available for outdoor employees.				
9	Toilet and wash areas are clean and sanitary.				
10	Evacuation procedures, routes, & contact information are posted.				
	Fire extinguishers: (a) w/in 75' of occupants, (b) have pin, (c)				
11	mounted, inspected within 12 months, (d) free from obstruction.				
12	Exits >=36" wide, w/o obstruction, with illuminated signs.				
13	Necessarily locked exits have interior emergency open feature.				
14	Fire doors are unlocked, closed, and not blocked open.				
15	A fire/evacuation drill occurred within 1 year.				
16	First Aid Kit: sanitary, orderly, filled, with locator signage.				
17	Is cash handling procedure acceptable??				
18	Pest & rodent controls in place and effective.				
19	Beacon or cell phones available @ unpowered locations.				
20	Brush/wild fire prevention measures good? Powerlines clear?				
urnitu	ure, Storage, Hanging Objects	Yes	No	N/A	Corrective Actions
21	Furniture, tables, desks, and chairs in good condition.				
22	Blade secured on paper trimmers.				
23	Step stools available where needed. No standing on chairs, tables, etc.				
24	Suspended lights & decorations are secured to ceiling or wall.				
25	Wall shelves are not overloaded.				
26	Bookcases & cabinets over 51/2 feet are secured to wall.				
27	File drawers are closed when not in use.				
28	No storage under desks which could create a trip hazard.				
29	Materials stored to minimize unnecessary climbing, reaching and bending.				
30	No storage within 18" of sprinkler heads or 24" from ceiling.				
	nery, Tools, Equipment	Yes	No	N/A	Corrective Actions
31	Saws & other machines have appropriate labels & guards.				
32	Grinders: mounted, work rest@1/8", & tongue guard @1/4".				
33	Ladders have legible safety and compliance stickers.				
34	Noncompliant items locked out by LOBOTO trained EE				
35	Operating permits for all compressors are current & posted.				
36	Lock Out Tag Out is available to trained person on site.				
37	Tools secured to prevent breakage or falling on someone.	-			
	Portable equipment inspected prior to use.				
-28	Welding area ventilated & rigs have backflow regulators.			┥	
38		Yes	No	N/A	Corrective Actions
39		res		IN/A	Corrective Actions
39 P E: g	loves, goggles, helmet, apron, sunscreen, earplugs, etc.				
39 P E: g 40	PPE signage is present where hazmat are used/stored.				
39 P E: g 40 41	PPE signage is present where hazmat are used/stored. PPE is available as appropriate for hazards.				
39 PE: g 40 41 42	PPE signage is present where hazmat are used/stored.PPE is available as appropriate for hazards.Is PPE maintained in sanitary condition and ready to use?				
39 P E: g 40 41	PPE signage is present where hazmat are used/stored. PPE is available as appropriate for hazards.				

Inyo County Risk Management IIPP Exhibit 1- Routine Inspection Form

Valking	g/Working Surfaces	Yes	No	N/A	Corrective Actions
45	Are all floor holes & floor openings guarded?				
46	Safe walking clearance where motorized equipment is used?				
47	Is ventilation adequate?				
48	Are employees advised of safe lifting practices?				
	Entrances, aisles & cooridors (>=32"), & stairways, are clear with				
49	adequatye and consistent headroom?				
50	Carpets and rugs are in good condition, flat, and secure.				
51	Floors are in good condition, flat, and dry.				
	Stairways, ramps (with non-slip surface), and corridors are				
52	illuminated with handrails (@>3 risers)/guardrails (@>30" rise) &				
52	stair treads in good condition. Ergonomic conditions adequate for workstations & processes?				
53 54	Work surfaces are clean, orderly, and unobstructed.				
-	-				
55	Loose broken floor tiles are removed and open space covered. Exterior walk paths sufficiently flat (<1/4" lift), unobstructed, & lit.				
56					
57	Work areas sufficiently illuminated (Ofc>500 lux, Shop>750 lux).				
58	Any tree/shrub intrusion to pathways or structures? cal Hazards - base on a random sampling of your area	Yes	No	N/A	Corrective Actions
		res	NO	N/A	Corrective Actions
59	Cords and plugs are in good condition.				
60	Space heaters are absent and discouraged.				
61	Surge protectors used for IT equipment & not piggybacked.				
62	Extension cords not used as permanent wiring or piggybacked.				
63	Wall plates are in place over outlets and switches.				
64	Breakers or fuse switches are clearly labeled.				
65	Light fixtures are covered for breakage and operational.				
66	Electrical panels have 36" of unobstructed access.	Vee	Na	N1/A	Corrective Actions
	Communications & Hazardous Materials (raw, waste, dust)	Yes	No	N/A	Corrective Actions
67	Is a list onsite of all HazMat present?				
	ODO his deviatementies is summer to several to several end of the set				
68	SDS binder/information is current, complete, and easy to locate.				
68 69	HazCom program in place (Right to Know, labeling, & training).				
68 69 70	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards.				
68 69	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets.				
68 69 70	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets. Compressed gas cylinders are labled, capped, secured, and				
68 69 70 71 72	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets. Compressed gas cylinders are labled, capped, secured, and upright in ventilated areas.				
68 69 70 71 72 73	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets. Compressed gas cylinders are labled, capped, secured, and upright in ventilated areas. Spill kits are available in hazardous materials storage areas.				
68 69 70 71 72 73 74	HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets. Compressed gas cylinders are labled, capped, secured, and upright in ventilated areas. Spill kits are available in hazardous materials storage areas. No leak/spill of hazardous material observed during inspection.				
68 69 70 71 72 73	 HazCom program in place (Right to Know, labeling, & training). All containers are labeled to identify contents and hazards. Flammables are stored in approved containers and cabinets. Compressed gas cylinders are labled, capped, secured, and upright in ventilated areas. Spill kits are available in hazardous materials storage areas. No leak/spill of hazardous material observed during inspection. Hazardous waste containers closed and labeled with contents, hazard/s, and accumulation date within 6 months.
