A Social Worker III may act as a lead worker to other social service workers. Incumbents are expected to work independently.

Social Worker III differs from Social Worker II in that the former receives the more difficult assignments requiring greater skill and depth of job knowledge in assessing problem situations and formulating plans for services. Incumbents normally work with a high degree of independence of action in administering services and in making use of agency or community resources. Social Worker III differs from Social Worker IV in that the latter requires advanced education.

Social Worker IV differs from the next higher class of Social Worker Supervisor I in that the latter is the first supervisory level. Social Worker IV differs from Social Worker III in that the latter does not require both a Master's degree and qualifying experience.
