FINAL NEGATIVE DECLARATION OF ENVIRONMENTAL IMPACT AND INITIAL STUDY

PROJECT TITLE: Conditional Use Permit (CUP) 2020-11/Desert Greens – Cannabis Cultivation

PROJECT LOCATION: 206 E. Hall Lane, in the community of Charleston View

PROJECT DESCRIPTION: The project consists of 43,560 ft² of outdoor cannabis cultivation that includes growing, harvesting and processing (drying, curing and trimming). This project has been applied for concurrently with a cannabis distribution business located on a parcel directly north of the cultivation project.

FINDINGS:

- A. The proposed project is consistent with goals and objectives of the Inyo County General Plan.
- B. The proposed project is consistent with the provisions of the Inyo County Zoning Ordinance.
- C. Potential adverse environmental impacts will not exceed thresholds of significance, either individually or cumulatively.
- D. Based upon the environmental evaluation of the proposed project, the Planning Department finds that the project does not have the potential to create a significant adverse impact on flora or fauna; natural, scenic and historic resources; the local economy; public health, safety, and welfare. This constitutes a Negative Finding for the Mandatory Findings required by Section 15065 of the CEQA Guidelines.

Additional information is available from the Inyo County Planning Department. Please contact Project Planner if you have any questions regarding this project.

S. Karawa	3/24/21
Name	Date

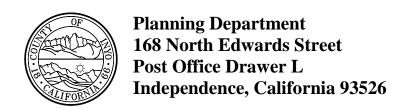

INYO COUNTY PLANNING DEPARTMENT

CEQA APPENDIX G: INITIAL STUDY & ENVIRONMENTAL CHECKLIST FORM

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVII, "Earlier Analyses," may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
- a) Earlier Analysis Used. Identify and state where they are available for review.
- b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
- c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance issues.

Phone: (760) 878-0263 FAX: (760) 872-2712

E-Mail: inyoplanning@inyocounty.us

INYO COUNTY PLANNING DEPARTMENT

APPENDIX G: CEQA INITIAL STUDY & ENVIRONMENTAL CHECKLIST FORM

- 1. Project title: CUP 2020-11/Desert Greens Cannabis Cultivation
- 2. <u>Lead agency name and address</u>: Inyo County Planning Department, PO Drawer L, Independence, CA 93526
- 3. Contact person and phone number: Steve Karamitros: 760-878-0268
- 4. Project location: 206 E. Hall Lane in the community of Charleston View
- 5. <u>Project sponsor's name and address</u>: Desert Greens LLC. Spencer McNeal, 485 Morro Blvd, Morro Bay, CA, 93442
- 6. General Plan designation: Residential Rural Medium Density
- 7. Zoning: Rural Residential
- 8. <u>Description of project</u>: The project will develop 43,560 ft² (just under 1 acre) of outdoor cultivation (with a canvas protectant), and includes 2,500 ft² of storage and processing space for harvesting, drying, and storage of the plant material. This project has been applied for concurrently with a retail cannabis business to be located on a parcel directly north of the cultivation project.
- 9. <u>Surrounding land uses and setting</u>: The proposed cannabis cultivation project is located in an area that is dominated by vacant, open space, land with a few single family homes found throughout. The terrain is flat, covered with desert scrub and surrounded by mountains on all sides. It is typical of basin and range geography.

Location:	Use:	Gen. Plan Designation	Zoning
Site	Vacant	(RRM) Residential Rural	(RR) Rural Residential

10. Other public agencies whose approval is required: Inyo County Building and Safety, Inyo County Environmental Health, Inyo Mono Agricultural Commission.

11. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, has consultation begun? Inyo County started the 30-day Tribal Consultation opportunity period, according to Public Resource code section 21080.31, by sending out certified written notices on January 14, 2021 inviting the Tribes to consult on the project. It described the project and location. The tribes that were notified are: Big Pine Tribe of Owens Valley, Bishop Paiute Tribe, Fort Independence Indian Community of Paiutes, Lone Pine Paiute-Shoshone Tribe, Timbisha Shoshone tribe, Twenty-Nine Palms Band of Mission Indians, Cabazon Band of Mission Indians and the Torrez Martinez Desert Cahuilla Indians. No comments have been provided and no formal consultation meeting date requested by any of the Tribes and, per Public Resources Code 21082.3 (d)(2) the consultation process is complete and the Negative Declaration of Environmental Impact is ready to be certified.

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

INYO COUNTY PLANNING DEPARTMENT ENVIRONMENTAL CHECKLIST FORM

Less Than Significant Potentially With Less Than Mitigation Significant No Significant Incorporation Impact Impact Impact I. AESTHETICS -- Would the project: a) Have a substantial adverse effect on a scenic vista? \boxtimes No, project's proposed $2,500 \text{ ft}^2$ - building space (for the harvesting, drying, curing, and storing of cannabis plants) will be 20-feet in height. It does not exceed the allowed height of 30-feet. There will also be a 576 ft² modular office trailer. These structures will likely be noticeable from the Old Spanish Trail Highway, but will not affect the overall scenic quality of the area or a particular scenic vista as you will be able to see over it to the surrounding mountains. b) Substantially damage scenic resources, including, but \boxtimes not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? No, there are no scenic resources other than views of the desert landscape and surrounding mountains. There are no trees, rock outcroppings or historic buildings, nor is the project located within a scenic highway corridor. c) In non-urbanized areas, substantially degrade the existing visual \boxtimes character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? No, although views to the project might be possible from high points on surrounding public lands, it will not affect the overall scenic integrity of the area as the views would be from a considerable distance, the proposed building is only 20-feet, which does not exceed the 30-foot allowed height, and this project is located near other buildings. \bowtie d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? No, the project is required to meet State regulations and County General Plan policy, related to light and glare; therefore, will not affect day or nighttime views. II. AGRICULTURE AND FOREST RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including The Forest and Range Assessment Project and the Forest Legacy Assessment Project; and forest carbon measurement methodology Provided in Forest Protocols adopted by the California Air Resources Board. Would the project: \boxtimes a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? No, the project is not located on farmland. b) Conflict with existing zoning for agricultural use, or a \boxtimes Williamson Act contract?

No, the project is not located on land zoned exclusively for agriculture and it is itself a type of agriculture. Inyo County has no Williamson Act contracts.

	Potentially Significant Impact	Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				
No, the project is not located on timberland.				
d) Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes
No, the project is not located on forestland.				
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				
No, the project is not located on farmland.				
III. AIR QUALITY: Where available, the significance criteria management or air pollution control district may be relied upon			Vould the proje	ct:
a) Conflict with or obstruct implementation of the applicable air quality plan?				
No, there is not an air quality plan for the area in which the pro-	ject is proposed.			
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				
No, there are not air quality standards being violated in the area	a for the area in whic	ch the project is pro	posed.	
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				
No, the project includes a cannabis cultivation facility. It is not none of the project components will release emissions that exceed		in non-attainment	for any criterio	n pollutants and
d) Expose sensitive receptors to substantial pollutant concentrations?				
No, the project will include the use of some fertilizers and pestic the County Environmental Health Department and State regulat				e regulated by
e) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people? No, although the project is cannabis cultivation that does product for an approximately 82-foot front setback, to maximize the distant				
IV. BIOLOGICAL RESOURCES: Would the project: a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				

A Biological Resources Report was prepared by applicant-supplied biologists who work for H&M Industries LLC. The California Natural Diversity Data Base (CNDDB); All Species Occurrences Database, US Fish and Wildlife; and, the California Native Plant

Less Than
Significant
Potentially
With
Significant
Mitigation

Mitigation Incorporation Less Than Significant Impact

No Impact

Society (CNPS) databases were queried to identify special-status plant and wildlife species that could potentially be found in the project impact area. Field surveys for the presence of special status species were also conducted on June 7, 2020. The parcel proposed for development had no observed candidate, sensitive or special status plants. The consultant biologist reported that no sensitive species were identified as having potential to occur based on site visit and literature review. There is potential, though, for desert tortoise and burrowing owl to occur within or adjacent to the project site. The project does not have the potential to impact Gravel's milk-vetch or Nye milk-vetch and Goodding's phacelia is not present. Because of these factors, the project is conditioned with a pre-construction survey for these animal species to verify that these species can be avoided prior to ground breaking activities. If any candidate, sensitive or special status plant or animal species are observed during the pre-construction survey, the project will be suspended until mitigation measures are implemented. Due to the absence of any candidate, sensitive or special status plant or wildlife species on the parcel and the extra step of a pre-development survey, the impact of the project is less than significant.

Impact

The biological resources report can be found at: https://www.inyocounty.us/services/planning-department/current-projects b) Have a substantial adverse effect on any riparian \bowtie habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? No, there is no identified riparian habitat on the project site based on the USFWS National Wetlands Inventory Mapping Tool, or in close proximity, that would be affected by the project. c) Have a substantial adverse effect on state or federally protected \bowtie wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? No, there are no identified wetlands on the project site based on the USFWS National Wetlands Inventory Mapping Tool, or in close proximity to any that would be affected by the project. d) Interfere substantially with the movement of any native \boxtimes resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? No, although the project site could potentially have occurrences of wildlife species, the project will not interfere with migratory fish or wildlife species. e) Conflict with any local policies or ordinances \boxtimes protecting biological resources, such as a tree preservation policy or ordinance? No, there are no local policies or ordinances protecting biological resources that pertain to the project site. \boxtimes f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? No, there are no adopted habitat or conservation plans that affect the project site. V. CULTURAL RESOURCES: Would the project: a) Cause a substantial adverse change in the \boxtimes significance of a historical resource as defined in Section 15064.5? No, a cultural study was conducted by RECON Environmental Inc. on the project site including a records request to the California Historical Resources Information System and a field survey was conducted on April 13-14, 2020. No historical resources as defined in Section 15064.5 were found. The study can be found at: https://www.inyocounty.us/services/planning-department/current-projects \boxtimes b) Cause a substantial adverse change in the

 \boxtimes

 \boxtimes

No, a cultural study was conducted by H&M Industries Inc. & RECON on the project site including a records request to the California Historical Resources Information System and the Native American Heritage Commission. A records search was requested from the EIC on March 23, 2020 and results were returned to RECON Environmental Inc. on July 20, 2020. No cultural resources were recorded on the project site. A field survey was also conducted by an H&M Inc. archaeologist on June 7, 2020. No archaeological resources as defined in Section 15064.5 were found. In the unlikely event an archaeological or cultural resource is discovered on the site during any future development, work shall immediately stop and Inyo County staff shall immediately be notified per Inyo County Code (ICC) Chapter 9.52, Disturbance of Archaeological, Paleontological and Historical Features of the Inyo County Code. Therefore, the project will not cause an adverse change in the significance of an archaeological resource if by chance one is discovered, pursuant to Section 15064.5. The study can be found at: https://www.inyocounty.us/services/planningdepartment/current-projects c) Disturb any human remains, including those interred \boxtimes outside of dedicated cemeteries? No, there are no known human remains or burial sites on the parcels. Refer to the response to (V b) for the potential for archaeological resources. While unlikely, human remains are a potential archaeological resource, and will be handled similar to other archaeological resources, as outlined in (V b) VI. ENERGY: Would the project: a) Result in potentially significant environmental impact due \bowtie to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? No, the project is a commercial cannabis outdoor-cultivation site. It will not require large amounts of energy and is required to meet California Building Standards including Green and Title 24 Standards. \Box \bowtie b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency No, although the project is located in one of the County's Solar Energy Development Areas (SEDA), as identified by the General Plan, it represents a very small percentage of that particular SEDA. The SEDA is 2,400-acre. The proposed combined projects, when developed would represent less than a percent of the entire SEDA, leaving plenty of land for subsequent solar energy development. VII. GEOLOGY AND SOILS: Would the project: a) Directly or indirectly cause substantial adverse effects, including the risk of loss injury, or death involving: \boxtimes i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. No, the project is not in an Alquist-Priolo zone. Also, since anywhere in California can be subject to earthquakes, subsequent to the approval of the CUP, the applicant shall work with the Inyo County Department of Building and Safety to implement the proper structural specifications. \boxtimes ii) Strong seismic ground shaking? No, the California Building Code ensures that structures be built according to required seismic standards, designed to withstand such events. X iii) Seismic-related ground failure, including liquefaction? No, the project site is not in an area known to be prone to ground failure. Also, as part of Inyo County Building and Safety Code, the

site will be assessed and a determination will be made if a soils report is necessary to avoid ground failure impacts to the built

No, the project area is primarily level, with the proposed facility built on a slope of less than five percent.

structures.

result from excavation, grading, and re-deposition of fill material. Building Standards that require Best Management Practices be impleaving the site.	Future developm	ent will require	compliance with th	ie Ĉalifornia
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				
No, the proposed project is not located in an area with a geologic value about the quality of the soil during the development of the property and Safety Department to employ the proper design standards that	, the applicant/d	eveloper shall w		
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				
No, the proposed project is not located in an area with a known expluring the development of the property, the applicant/developer she employ the proper design standards that mitigate for expansive soil.	all work with Iny			
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				
No, the project will require a County approved waste handling syst are common in the area and the soils are capable of supporting the approved by the Inyo County Environmental Health Department.				
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? No, the project site does not include a unique paleontological or ge	ologic feature.			
VIII. GREENHOUSE GAS EMISSIONS: Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				
No, the proposed cannabis cultivation project will not generate gre Temporary construction-related emissions will occur, but such dust practices.				
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?				
No, the proposed project will not cause conflicts with a plan, policy gasses	or regulation a	dopted for the pu	rpose of reducing	greenhouse
IX. HAZARDS AND HAZARDOUS MATERIALS: Would				
the project: a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				
No, the cannabis outdoor-cultivation project will use some fertilize fertilizers and/or pesticides will be regulated by the County Depart State and local regulations regarding hazardous materials.				
b) Create a significant hazard to the public or the			\boxtimes

Incorporation

Less Than Significant Impact

No Impact

No, the project proposes 3.75-acre feet of water annually will be used for the cultivation. The parcel of land that the project is proposed for is zoned for residential use. In California each person uses about 108-gallons of water per day (US EPA). The average California household size is 2.9 people (US Census). Given that the residential lot could have two-units, about .70-acre feet of water could be used on the same project area without discretionary review. Also, the project is located in an area identified as a 'low and very low priority' basin (State Sustainable Groundwater Management Act Basin Prioritization Map, May 2020). The applicant will have to obtain well permit(s) from the County Environmental Health Department and meet all State regulations pertaining to wells and groundwater.

Impact

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
i) result in a substantial erosion or siltation on- or off-site; No, the project is proposed in an area that is virtually flat and there are impervious surface from the project. There are some off-site run-off are been reviewed by the County Public Works Department and they found issues are found at pre-construction, they will be addressed during built	as east and no issues re	southeast of the pr garding grading a	roject location. T	he project has
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;				
No, the project is proposed in an area that is virtually flat and there are impervious surface from the project. No Impact

No, the applicant is requesting a conditional use permit grow commercial cannabis, which is required by the County's zoning code. The project site is located in the Rural Residential zoning designation, with a Rural Residential Medium Density (RRM) General Plan designation. Both allow for cannabis cultivation.

XII. MINERAL RESOURCES: Would the project: a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				\boxtimes
No, the project makes use of undeveloped land and no known mineral resources is being foregone by this project.	resources are	located on it. No	o extraction of kno	wn mineral
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan? There are no known locally-important mineral resources being forego	□ ne as a result	of this project		
XIII. NOISE: Would the project result in the: a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? No, there will be some construction related noise from grading activity projects will not exceed acceptable levels. Also, Occupational Safety and				
noise will not exceed acceptable levels. Also, Occupational Safety and 8 hour day and 100 for a limit of 2 hours. Effects to sensitive receptors 'during daytime business hours' only.				
b) Generation of excessive groundborne vibration or groundborne noise levels? No, exposure to noise levels will be primarily airborne, and groundborne.	□ rne vibrations	if any would be	□ brief.	\boxtimes
c) For a project located within the vicinity of a private airstrip or, an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				
No, the proposed project is not located within an airport land use plan	, or within 2-	miles of a public	airport.	
XIV. POPULATION AND HOUSING: Would the project: a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				
The proposed project is not likely to induce population growth. Worke Given the lack of residential infrastructure and services, employee hot		-	*	
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				

No, the proposed project will not displace existing housing or create a situation where replacement housing will be necessary. It is in

XV. PUBLIC SERVICES: Would the project:

an area of very sparse residential development.

a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant

environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection? No, the Southern Inyo Fire Protection District was consulted on area were given.	the project. No co	oncerns related to t	keir ability to serv	ve the project
Police protection? No new police service will be required because of this project. Of the project of the proje	☐ Onsite private seci	urity will be used at	\(\sum \) the project locati	on. \Box
Schools? No new school service will be required because of this project.				
Parks? No new parks will be required because of this project.				\boxtimes
Other public facilities? No, the proposed project will not create a need for additional putility to create an electrical connection for the project site.	ublic services. The	applicant is curren	ntly working with	⊠ the SCE electric
XVI. RECREATION: Would the project: a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				\boxtimes
No, the proposed project will not increase the use of existing red in the level of service required.	creational facilitie	s. No portion of thi	s project anticipa	tes any change
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				
No, the proposed project does not include, nor will it cause, a n have an adverse physical effect on the environment.	eed for an increas	e in parks or other	recreational facil	ities that might
XVII. TRANSPORTATION: a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?				
No, the proposed project will not significantly increase traffic, of facilities. Because of the extremely remote nature of the project that do would be unchanged by this project. The concurrent cult County Road Department. With regard to the roadway, a conditional Spanish Trail Highway (a County Road) will be included, as we	location, few alter tivation and distriction tion for the applica	rnative transportati bution projects wer ant is to obtain an e	on opportunities e e both reviewed to encroachment per	exist, but those ogether by the mit for the Old

No, the concurrent projects consist of cannabis distribution & cultivation businesses. They will not conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b). The cultivation project will generate 3 daily trips (initially) by employees, with the maximum being 15 daily trips (at the full scope of cultivation). The cultivation project also requires approximately 1 weekly trip of the company vehicle for transporting product. The concurrent cannabis distribution project will generate about 2-5 vehicle trips coming and going per day, from employees, and 2-3 vehicle trips per week from suppliers and facility vehicles. Based on this information, it can be determined that the average daily trips are less than the 100 trips that would require a detailed traffic analysis on the project. Therefore, the Project will result in no impact to this resource. The subject site is not within one-half mile of either an existing major transit stop or high quality transit corridor.

	Potentially Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
c) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

XIX UTILITIES AND SERVICE SYSTEMS: Would the project:				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? No, the proposed project will not result in the construction of new or expectation.	□ r expanded utility	or service systems	∑ . SCE electricity	lines run
worth to south along an access need adjacent to both the distribution				

No, the proposed project will not result in the construction of new or expanded utility or service systems. SCE electricity lines run north-to-south along an access road adjacent to both the distribution and cultivation projects. The applicant is working with SCE to establish a connection to this preexisting infrastructure. Water will be obtained from on-site wells and wastewater will be treated by on-site septic systems.

	Potentially Significant Impact	Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?				
Yes, all water necessary for the project will be pumped from a preexist applicant. The applicant will also be using a recycled water system for result in a need for new entitlements of water resources (except well promise commercial cannabis cultivation business. Current principle uses for designation, include not only a primary and secondary dwelling unit, would likely have equivalent water usage as the proposed cannabis for low and very low priority' basin (State Sustainable Groundwater Manapplicant will have to obtain well permit(s) from the County Environmentaining to wells and groundwater.	or irrigation. Impact Incorporation Impact Impact

of runoff, post-fire slope instability, or drainage changes? No, the proposed project location is on flat land and will not create downslope or downstream flooding or landslides. XXI. MANDATORY FINDINGS OF SIGNIFICANCE: \boxtimes a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory? No, the project will not impact or degrade the quality of the environment. The limited impacts to resources on the project area are less than significant. The project proponent has incorporated avoidance measures into the project design, which has been written into the Conditions of Approval for the permit & includes the following: the applicant shall conduct additional surveys (pre-construction) to ensure the absence of sensitive plant or animal species; the applicant shall follow the County's General Plan Visual Resources Policy 1.6- Light and Glare; the applicant shall consult with the County Environmental Health Department to assure that all septic requirements and water well standards are met; the applicant will work with the Great Basin Unified Air Pollution Control District to develop practices for crop applications that control for the terpenes from cannabis plants that cause odors, as well as fugitive dust during construction; and, the applicant shall provide evidence that a proper wastewater plan for the project is in place prior to obtaining a building permit, approved by the County Environmental Health Department. Per the Lahontan Waterboard, the plan shall show that either (a) that wastewater will be collected in a sealed container and hauled for disposal at a permitted facility; or, (b) ensure that a separate regulatory authorization is obtained for onsite disposal of the cannabis wastewater by enrollment under the Small Industrial General Order. Disposal to land is prohibited unless this authorization is obtained. \boxtimes b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)? No, the proposed project does not have impacts that are individually limited, but cumulatively considerable. It was evaluated concurrently with a cannabis distribution project that has also been applied for. The distribution facility will use minimal water for domestic use, and has a limited building footprint. There is another cannabis cultivation and retail project less than 2 miles to the east. These projects, although in close proximity to each other, are small enough in scale, relative to principle permitted uses, and different enough in nature, that they pose different potential impacts; their similar impacts are less than significant. Due to the sparseness of the natural environment, and lack of disturbance to plant or animal habitat, this location is well suited for the proposed developments. \boxtimes c) Does the project have environmental effects which

No, the proposed project has no known environmental effects which will cause substantial adverse effects on human beings either directly or indirectly. The proposed project would not adversely impact the residents in the vicinity and may have positive impacts resulting from employment opportunities.

will cause substantial adverse effects on human beings,

either directly or indirectly?
