 - * No Public Comment
 - *Motion to approve was made by Commissioner Roeser and seconded by Commissioner Garcia.

 All in favor
- 6. Request your Commission approve Resolution No. 2021-14 to amend the Overall Work Plan (OWP) to include roll-over Rural Planning Assistance (RPA) funds. RPA funded grants unexpended amount totaled \$55,268.66 as of June 30, 2021.
 - *No Public Comment
 - *Motion to approve was made by Commissioner Roeser and seconded by Commissioner Berg. All in favor

DISCUSSION ITEMS

7. None

INFORMATIONAL ITEMS

8. ESTA Report

• Executive Director's Report

*Phil Moores stated that he submitted a staff report in the packet and gave a brief update.

Phil said that they finished their audit this year with no issues. He went on to say that the company taking passengers from Bishop Airport to Mammoth is advertising paying their drivers \$6.00 more an hour than ESTA. Phil said that he is looking into increasing their revenue to be able to be more competitive and offer their drivers an increase in wages. Phil went on to say that ridership is still down and the electrification plan will be starting next month.

9. Tribal Report

None

10. DVNP Report

None.

*John Pinckney stated that he received word that Jane Mercer is no longer with Death Valley National Park and he does not know if someone will take her place in the meetings.

11. Caltrans Report

*Dennee Alcala reported on the Olancha Cartago 4-Lane Project. She said that the Desert Tortoise fence construction contract will wrap up at the end of the month. She said that the prime construction for the 4- lane contract has been approved and construction should begin in 2022. Dennee went on to say that the California Transportation Commission is posting the 2023 Active Transportation Program workshop today from 1-4pm Dennee then stated that Mark Heckman has provided a power point presentation in the packet and will also give a short presentation.

*Mark Heckman shared the Bishop Area Access Circulation Study from the packet and gave a short presentation.

12. City of Bishop Report

*Commissioner Muchovej reported for Deston Dishion that they are still working on the East Line St. Bridge and there are no updates since the last meeting.

13. Executive Director's Report

*Michael Errante reported that December 19th is wheels down for the Bishop Airport. He said there will be a 10% locals discount for flights. Mike also reported that they are working diligently on the expansion of the terminal. He went on to say that the North Round Valley Bridge project has had some delays and they are about 2 or 3 months behind. It is anticipated the Bridge will be done by late spring 2022.

14. Reports for all members of the Inyo County LTC

CORRESPONDENCE

*Commissioner Thompson commented that he had been one of the grants from the Sierra Nevada Conservancy; He said it is a good project. Doug said it mentioned the CAT team that we worked on for travel management for the Forest Service. He said they are going to use that model. He said it's complicated and is a long slow process and it took months to go over 3000 miles of road. He said he believes the Buttermilks will be the same. Thompson went on to say that hopefully the grant will open up the process, and the more stakeholders you can get into the process early on is important.

Jen Roeser asked the group where the LTC used to meet prior to the pandemic and if there is a possibility to have hybrid meetings. Mike explained that meetings were held at the Bishop City Council Chambers, and in Independence. Jose replied that the Chamber is not yet ready for in person meetings. Rick mentioned that the Quilter COB could be a possibility.

Updated 2018

NARRATIVE

Inyo Local Transportation Commission FIRST QUARTER OF THE 2021-2022 OVERALL WORK PLAN (OWP)

Work Element

100.1 Compliance and Oversight:

The principal activity conducted in this work element is the documentation of planning-related activities, and the support and maintenance of services required to implement the transportation planning programs and processes. This includes, preparing agendas, attend monthly meetings, completing minutes and updating the involtc.org website. During the 1st quarter of FY21-22, Inyo LTC had two commission meetings, which were all conducted over Zoom.

110.1 Overall Work Program (OWP):

Staff worked on streamlining the internal process for producing quarterly RPA invoices. Updated improved monthly tracking spreadsheets with LTC OWP related expenditures. First quarter invoices will be submitted during the second quarter. Received FY2021 Reconciliation letter containing Rollover RPA funding; began preparation of Amendment #1 to the OWP.

200.1 Regional Transportation Improvement Program (RTIP):

Discussions continued regarding the up-coming 2022 STIP and RTIP cycle between ICLTC staff and ICLTC and Caltrans staff. ICLTC received & reviewed the Caltrans Draft 2021 Interregional Strategic Plan at the August 2021 LTC meeting. Staff prepared and submitted a comment letter. Most of the Inyo LTC RTIP development occurs in 1st and 2nd quarters of FY21-22.

300.1 Administer Transit:

Administer and allocate Local Transportation Funds and State Transit Assistance. This is an on-going activity, including the periodic review of transit route performance reports and Transit funding. This element includes monitoring Eastern Sierra Transit Authority (ESTA), Eastern Sierra Area Agency on Aging (ESAAA), both Transportation Development Act (TDA) claimants. LTF and STA funding allocations for FY21-22 were made in June at the LTC meeting.

310.1 Coordinate Transit Services:

Focused on optimizing the delivery of transportation services by reviewing opportunities to enhance overall transit performance within funding constraints and mindful of public need. Continuous reporting and coordination with the County and ESTA on the Transit Security Grant program, PTMISEA transit grant, LCTOP and SGR program. During the July 2021 LTC meeting, ICLTC approved resolutions allocating PTMISEA and STA funds for vehicle replacement and new building projects. At the August 2021LTC meeting, ICLTC reviewed and approved ESTA's SGR project list and related programming documents.

400.1 Project Development and Monitoring:

LTC staff and a consultant work to submit an Olancha-Cartago RAISE Grant application in early July 2021 and we continue to receive updates from Caltrans on status of the project. We continually monitor and assist with preliminary development of local projects. Staff has been monitoring the FLAP grant proposal that was submitted the prior quarter and discussing potential for future grant submittals. The request for a Federal Appropriations, Member Designated Funding (earmark) for the Olancha Cartago 4-Lane Project has stalled at the legislative level in D.C. Staff has also been preparing of the next round of project study reports and is planning to seek direction from the LTC on project selection.

500.1 Coordination and Regional Planning:

Staff attended phone conferences with the Rural Counties Task Force (RCTF) and participated in ECTPP negotiations and discussions. Staff attended Mono County LTC meetings and routinely corresponded with Mono County to share strategies for programming and planning. We continued monitoring the implementation of AB628, the OHV shared use pilot program.

600.1 Pavement Management System (PMS)/Geographical Information System (GIS): Conducted field surveys to develop comprehensive PCI data. Continued development of our in house pavement management system and surveyed existing roads.

700.1 Planning Programming and Monitoring

A majority of these tasks are the same as those in Work Elements 200.1, 400.1, 500.1 and 600.1. PPM just represents a second available source of funding. Work in 1st Quarter included working with the USFS on finalizing easement agreements. Staff requested allocation of future funding and attended multiple meetings regarding the development of the Bishop Airport as it relates to commercial air service and linking that with ground transportation routes, transportation alternatives and transit.

Agenda Item #6 ESTA Report

STAFF REPORT

Date: February 16, 2022

Subject: ESTA Annual Report FY20-21

Initiated by: Phil Moores, Executive Director

BACKGROUND:

The ESTA Joint Powers Authority agreement requires the submission of an annual report after the close of the fiscal year. With the fiscal audit completed, the financials of FY20-21 are fixed and ready for reporting. The annual report includes information on ridership, costs, revenue, and expenses.

ANALYSIS/DISCUSSION:

ESTA has several exciting projects underway including our Short Range Transit Plan and Coordinated Human Services Plan. Also being worked on is our zero-emissions transition plan.

While the Covid-19 pandemic took a bite out of our revenue, FY20-21 ended with a budget surplus and ESTA reserves remain strong in 2022, and the fiscal audit ended without findings.

Reds Meadow Shuttle in the summer of 2020 did not run due to Covid-19.

The ESTA fleet size is not optimal in that we have too many older buses as spares. Once we receive the new cutaways, the older buses will be retired. This will optimize our fleet size and reduce maintenance costs.

ESTA's IT is satisfactory, but would benefit from some new technology. The ongoing Short-Range Transit Plan will evaluate our systems and make some recommendations for upgrades. Facility security, micro-transit in Bishop, and Mobile ticketing are being considered.

Ridership was down 57% for the year. Reduced service hours and ridership absorbed the still required expenses and resulted in increases in cost per hour and subsidy per passenger. The loss in passenger fare revenue is something to watch. Accidents were down without the hazardous Reds Meadow Shuttle.

The following tables summarize the performance and state of ESTA at the end of FY20-21, June 30, 2021.

| System Stats | | | | | | | | | | | |
|----------------------------------|-----------|-----------|-----------|-----------|---------|--|--|--|--|--|--|
| Fiscal Year | 18 | 19 | 20 | 21 | Var | | | | | | |
| Ridership | 1,076,085 | 1,123,614 | 880,531 | 379,312 | -56.92% | | | | | | |
| Service Hours | 58,287 | 58,340 | 52,466 | 49,069 | -6.47% | | | | | | |
| Revenue Miles | 961,034 | 944,357 | 863,766 | 838,087 | -2.97% | | | | | | |
| Fare Revenue ¹ | 1,899,354 | 2,011,500 | 1,808,606 | 1,325,413 | -26.72% | | | | | | |
| Subsidy Revenue ² | 3,062,731 | 3,060,994 | 3,488,148 | 3,608,061 | 3.44% | | | | | | |
| Operating Expenses | 4,623,575 | 4,454,065 | 4,433,259 | 4,281,611 | -3.42% | | | | | | |
| Preventable Accidents | 15 | 22 | 13 | 9 | -30.77% | | | | | | |
| Maintenance Expense ³ | 550,469 | 566,724 | 609,460 | 575,304 | -5.60% | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |

| KPI's | | | | | | | | | | |
|-----------------------------|---------|---------|---------|---------|---------|--|--|--|--|--|
| Fiscal Year | 18 | 19 | 20 | 21 | Var | | | | | |
| Farebox Recovery | 41.08% | 45.16% | 40.80% | 30.96% | -24.12% | | | | | |
| Subsidy per Passenger | \$2.85 | \$2.72 | \$3.96 | \$9.51 | 140.12% | | | | | |
| Maintenance Cost per Mile | \$0.57 | \$0.60 | \$0.71 | \$0.69 | -2.71% | | | | | |
| Passengers per Hour | 18.5 | 19.3 | 16.8 | 7.7 | -53.94% | | | | | |
| Accidents per 100,000 Miles | 1.56 | 2.33 | 1.51 | 1.07 | -28.65% | | | | | |
| Cost per Hour | \$79.32 | \$76.35 | \$84.50 | \$87.26 | 3.27% | | | | | |

¹ Includes marketing revenue and MMSA revenue, but does not include treasury interest.

² Includes Town funds and other operating funds, but does not include insurance payments or fares.

³ Include Maintenance of equipment

Revenues were overall strong thanks to federal assistance and contract services (MMSA & Town). Passenger fares were down considerably without Reds Meadow Shuttle. Maintenance and fuel-and-oil expenses were reduced, and the overall expenses were reduced mostly due to cancelled Reds Meadow Shuttle in the summer.

| Revenues | | | | | | | | | | | | |

Re: Re-establishment of Regional Rail Service Within the Eastern Sierra Corridor

Dear Inyo County Local Transportation Commission,

The recent High Speed Rail investments in California and Las Vegas and the \$31B California Budget surplus presents a unique opportunity: re-establishment of rail service within the Eastern Sierra corridor. This can be achieved by extending Metrolink service from Lancaster to Bishop, and then ESTA bus service from a Bishop station to Mammoth. Constructing rail up to Bishop as a pilot phase could allow for further investment justification as the demand and regional rail service matures. As noted in Chapter 5 of the 2005 Eastern Sierra Transportation Study by Kern County, establishing rail within this corridor is both possible and desired by the local communities. The benefits for both public transit and freight transportation are numerous:

- 1. Eastern Sierra communities are a significant distance from neighboring large cities containing higher availability of medical care, other services, shopping, and recreation.
- 2. While Lancaster Metrolink Station would make sense for now, eventually the new Palmdale HSR Station could be the future Eastern Sierra Railroad Terminal. If the railroad were eventually extended to connect with Reno, a freight rail service could capture a percentage of local intermodal traffic and provide enhanced access to mineral resources in western Nevada for both Nevada and Southern California. Having access to the High-speed rail network and Reno/Lake Tahoe would make for a robust and highly desirable regional rail system in the area.
- 3. Rail service could be significantly funded by tourism travel to the Eastern Sierra, especially to Mammoth Lakes, Yosemite, and Lake Tahoe. Food service, a complementary drink, and quality Instagram photos will likely attract ridership. Traveling from LA to Mammoth in a day and back could further attract ridership and boost local economies, if the passenger service were to operate on a schedule matching this demand.
- 4. With increasing numbers of electric vehicles, the impacts of long battery charging times will add an emerging form of congestion for travelers. For example, Tesla superchargers take 15+ minutes per car battery compared to a 5-minute gasoline stop. If one EV is charging and forms a line behind it, the last EV will be waiting for a significant amount of time. A passenger train would offer a means to eliminate this inconvenience while additionally using less energy to transport the passenger more convenience while also being better for the environment and the economy.
- 5. Local companies and military bases may benefit from the enhanced access to both the outdoor activities to the north and city life to the south to better retain valuable talent. Additionally, rail could offer a cheaper means of receiving valuable materials.
- 6. More rail investment could mean local electrical grid and EV charging infrastructure could be optimized for fewer upgrades and thus lower cost. According to Reuters, the electrical grid is estimated to require a 2x capacity increase to meet the EV charging demand and Forbes claims de-carbonizing the grid will cost in the neighborhood of \$4.5T. In the end, a train uses 40-50% less energy for a passenger to travel compared to a car and emits 80-90% less emissions, according to Amtrak. Since the country is tending

towards de-carbonizing, it makes sense to invest in something that would be more energy efficient, and in doing so mitigate the high costs that are coming to upgrade the grid.

For cost savings, the route could follow the historical Southern Pacific rail grade between Searles and Bishop which continues to retain much of the original right-of-way. Investment along the Eastern Sierra Corridor would transform passenger and freight potential for the region in a significant way and allow residents and businesses to create increased economic output, travel in a low-hassle manner, and support state and federal climate initiatives. According to the 2019 Caltrans freight assessment of the Eastern Sierra corridor, both freight and tourism are expected to increase at a minimum of 40% by 2040. Investment to anticipate this traffic growth would be fortuitous.

Please see the attached pages for a revised route proposal to the original rail feasibility study.

Sincerely,

Brian Moore

Aerospace Engineer

Agenda Item #12

Commissioner Thompson - SRTI Update

Hello,

It is hard to believe that after more than two and a half years, the SRTI is coming to an end. All project work will be completed by January 31, 2022. We are thrilled with the work that, with your help, we have all accomplished – in spite of a global pandemic and wildfires, which have caused major disruptions to daily life in the Eastern Sierra. Before we get to the updates and next steps, a quick note of thanks to all of you who have tuned in and participated in the SRTI process. Thank you!

Back in September and October 2021, we shared the Eastern Sierra Sustainable Recreation Partnership (ESSRP) Prospectus for Future Investment and the final eight SRTI Projects. To wrap it up, we put all of this into a single document – the SRTI Portfolio of Projects. This document,

and all of the other deliverables and related documents produced by the SRTI, will live on on the <u>SRTI pages of the MLTPA website</u>.

Sustainable recreation will continue to be a priority for our region and we are thrilled to be able to hand off the work done to date to other organizations and agencies in the region. We are optimistic that the ESSRP is taking steps to update their collaborative structure by formalizing agency involvement via a Memorandum of Understanding. They have also developed a Tribal Consultation Sub-Committee, which will be talking to regional tribal councils and inviting them to participate at the Partnership level.

The <u>Eastern Sierra Council of Governments (ESCOG)</u>, which includes Inyo County, Mono County, the City of Bishop, and the Town of Mammoth Lakes, has been advancing projects in support of their <u>Sustainable Recreation and Ecosystem Management Program (SREMP)</u>. We are thrilled that the ESCOG has agreed to take on ownership of several of the SRTI Projects.

SRTI Projects will be taking their next steps over the next several months. Here is an update on the status of the eight SRTI projects as of today:

- Buttermilk Infrastructure and Recreation Planning Initiative (BIRPI)
 - On November 22, 2021, ESCOG was notified that their project application was recommended for funding (\$247,300) by a grant from the National Fish & Wildlife Foundation.
 - ESCOG will take the lead on managing this project, which is expected to take place

from spring 2022 to fall 2023.

• Visitor Connection Program

- Multiple funders were investigated and ultimately no grant funding sources were interested at this time.
- ESCOG will discuss the possibility of self-funding this effort (each member agency contributes funding to the project). We expect this to be discussed and resolved in the first half of 2022. The item will be agendized for discussion at the next-ESCOG meeting on Friday, February 4 at 1PM. If ESCOG partner agencies agree to fund the program, implementation could begin as early as late 2022.

• Regional Recreation Capacity

- Multiple funders were investigated and ultimately no grant funding sources were interested at this time.
- This project has been handed off to the ESCOG as a blueprint for regional sustainable recreation capacity needs as the ESCOG works to expand capacity in multiple areas.
 Additional capacity for ESCOG will be critical for continuing the momentum for sustainable recreation in the Eastern Sierra.

• Eastern Sierra Campground Improvements

- A Concept Proposal to support the ESCOG in this national profile project was not advanced by the Sierra Nevada Conservancy, as the project elements were not a match for Proposition 68 bond funding. This project proposed to SNC is one piece of a larger infrastructure effort being pursued by the Inyo National Forest and the Washington Office of the U.S. Forest Service to ultimately make millions of dollars in campground improvements using the tools of innovative finance.
- The effort to develop innovative financing solutions for campground infrastructure improvements is being funded by a grant awarded to <u>Quantified Ventures</u> by the <u>Innovative Finance for National Forests</u> program.

• Eastern Sierra Towns to Trails Plan

- On December 1, 2021, ESCOG was notified that their project application was recommended for award by Sierra Nevada Conservancy staff and will go to the SNC board for review at the March 10, 2022 meeting. (\$370,443).
- If this project is funded by the SNC Board, ESCOG anticipates this project would begin in late summer of 2022 and be completed by December of 2024.

• <u>Dispersed Camping Mitigation: Camp Like a Pro</u>

- Mono County has been notified by the SNC that their Concept Proposal for the "Dispersed Camping Mitigation: Camp Like a Pro" program has been elevated to a request for a full grant proposal for consideration by SNC staff. In addition, Mono County will be pursuing a District Maintenance Agreement with Caltrans, a program which currently has available funding.
- If this project is funded by the SNC, Mono County anticipates the project could begin in the fall of 2022. With a Caltrans District Maintenance Agreement, work could begin in summer 2022.

Vulnerability in California's Eastern Sierra: Asset Inventory & Gap Analysis

- In December 2021, ESCOG received notification that their project application was not selected for grant funding from the California Resilience Challenge.
- In light of the State of California's recent \$15 billion commitment to funding climate solutions, the SRTI team is optimistic that other funding sources will become available and that the ESCOG will be able to submit credible applications for funding.

• Eastern Sierra Scenic Byway Analysis

 Due to the complex land tenure issues associated with this program, along with major structural updates required at current locations of interpretive signage, the SRTI was unable to find a "lead agency" to take ownership of the Byway refurbishment project. After meeting with the partners of the ESSRP in late January 2022, the SRTI team is optimistic that the ESCOG will consider refurbishing elements of the Byway program as a component of the SRTI's <u>Visitor Connection Program</u>.

More detailed information about each project is available at the SRTI's <u>Projects and Funding</u> webpage.

The SRTI Team encourages other organizations and governmental entities to pursue additional grant opportunities based on <u>project ideas that came through the SRTI's Recreation Stakeholder process</u>. For some funders, the collaborative nature of the SRTI effort creates a more competitive grant application.

If you have any questions you can reach us via email at srti@mltpa.org through March 1, 2022. After that time, keep an eye out for project specific email updates and where to go for additional information from the ESSRP, courtesy of the MLTPA team.

Thanks!
Kristy Williams

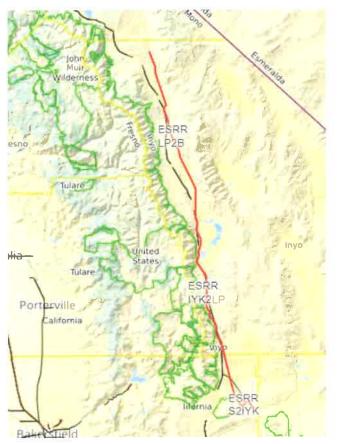

Figure 2: Proposed Route Terminal: Laws or Eastern Sierra

Figure 1: Proposed Route (red)

The proposed route up to Bishop terminating either at Laws or the Bishop airport could provide a good starting point to evolve the rail within the region. The route would contain Class 6 track between Searles and Bishop to allow for faster travel (up to 110 mph) between these long stretches of desert, and anticipate future higher speed service along the corridor. This contrasts the original rail feasibility study which considered a more direct line through Red Rock Canyon and terminating in Mammoth Lakes. Perhaps the original proposal is obtainable after rail demand has increased.

While the rail between Lancaster and Searles is only Class 3 track (freight speed limit 40 mph & passenger speed limit 60 mph), it might be sufficient for a pilot rail project, while upgrades and adding slightly faster routes may be added as the regional rail service matures. The route would have the potential to go at least as fast as driving between the two areas but within the comfort of a train allowing for the avid tourists and adventurists to have even more energy to devote to their vacations.

Proposed Stations: Rosamond, Mojave, Inyokern, Lone Pine, and Bishop.

New Rail Distance: 146 miles

The original rail feasibility study considered this region to cost \$5.5M/track mile in 2005 dollars. Accounting for 18 years of 3% inflation and multiplying by a safety factor of 15%, the project cost would be around: \$1.57B. This cost to build 146 miles of track is at or below the costs to add several miles of commuter rail within larger cities.

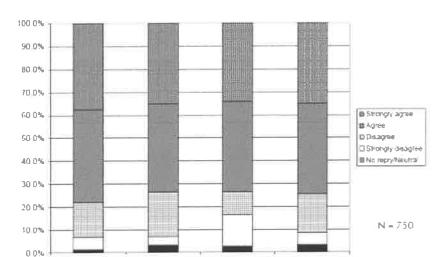

Project funding could come from:

- California budget surplus
- Federal Railroad Administration Grants/Loans

Imro

- Recent Federal infrastructure bill
- Federal Lands Transportation Program
- Federal Lands Access Program
- Perhaps a small or modest increase in sales tax within the Eastern Sierra corridor.

Excerpts from the 2005 Eastern Sierra Transportation Study conducted by Kern County:

Additionally, the state of Nevada in their 2021 State of Nevada Rail Plan has been contemplating adding commuter rail between Carson City and Reno along the former Virginia and Truckee Railroad right-of-way, seen in figure 6. Rail service could extend from here to the former Carson and Colorado right-of-way at Mound House, NV, and continue east to meet up with rail currently in place between Fallon and Hawthorne. From here the rail could extend south to Bishop following the historic C&C RR Mina Branch narrow-gauge route, as seen in figure 7. This would provide a convenient rail line for both freight and residents in Southern California, Northern Nevada, and the Eastern Sierra to visit the many tourism and business opportunities within the region.

Just north of Bishop along the old narrow-gauge rail grade the route winds along US 6, as seen in the figure 8. It would likely be beneficial to drill a tunnel instead of following the narrow-gauge route entirely. This would allow for faster rail travel, especially for freight trains, through this mountain pass both from avoiding the majority of the winding route and the ability to add a milder grade suitable to rail service.
