

INYO COUNTY WATER LAB

2023 Instructions on filling out the water lab slip.

Water System Name and ID# Or Owner Name and Address	Sample Collection Location	Sample Date and Time	Sampler Initials	Bottle ID Information and Collector Remarks
1	2	3	4	5
Sample Type <input type="checkbox"/> Routine <input type="checkbox"/> Repeat <input type="checkbox"/> Other: _____	Water Type <input type="checkbox"/> Potable <input type="checkbox"/> Pool <input type="checkbox"/> Surface Water Other: _____	Is Sample Chlorinated? <input type="checkbox"/> No <input type="checkbox"/> Yes Residual: _____	Test Type <input type="checkbox"/> PA <input type="checkbox"/> QT <input type="checkbox"/> QT2000	

1. Enter water system name and public water system ID number, company name, or property owner information.
2. Enter sample location, example: northeast hose bib, kitchen sink faucet, well sample tap.
3. Date and time the sample was collected. All samples are time sensitive and must be processed in the lab within 30 hours of collection time (potable samples) and within 8 hours of collection time (non-potable samples), please call the water lab for details at (760) 878-0234. It is best to collect samples same day as dropping off. Please keep the sample refrigerated until drop off. If you have a small cooler, place an ice block/blue ice in the cooler and transport the sample until it can be placed into the refrigerator at the Bishop or Independence drop off location.
4. The person taking the sample initials here.
5. On top of the bottle cap, write small with waterproof sharpie (after sample is taken), a unique name that will identify the sample bottle with the Bottle ID label on the lab slip, i.e. customer name or address. The Bottle ID on the lab slip and the bottle cap should match exactly.

Sample type: ***Routine*** (a bacteriological compliance sample the water supplier is required to collect on a regular basis) ***Repeat*** (sample taken in response to a total coliform and or E. coli positive routine sample for a public water system) ***Other*** (investigative, start up, new construction, special non-compliance sample for public water systems)

Water type: ***Potable*** (ground water, untreated or treated, or drinking water) ***Pool*** (swimming or spa) ***Surface water*** (above ground or ground water under the influence of surface water) Call the lab if this is the first time collecting a sample with surface water. ***Other*** (example: other than listed above)

Is Sample Chlorinated? The water would need to be tested to see if chlorine is present. Private wells are not usually chlorinated, please call the Environmental Health Department at (760) 878-0238 if you have any questions. If your water system is regularly disinfected, then enter the chlorine residual tested with a meter.

Test Type:

PA presence or absence of total coliform and Escherichia coli, 2023 cost \$37

QT quantifies with most probable number (MPN) result between 0 and >200.5 of total coliform and Escherichia coli, 2023 cost \$48

QT2000 quantifies with MPN result between 0 and >2419.6 total coliform and Escherichia coli, 2023 cost \$53

Samples will be invoiced to the customer the first week of the following month.

Water sample drop off locations and schedule:
